AUTHOR INDEX VOL. 75

Adams, M.W.W.
The metabolism of hydrogen by extremely thermophilic, sulfur-dependent bacteria (75) 219
Ames, G.F.-L., Mimura, C.S. and Shyamala, V.
Bacterial periplasmic permeases belong to a family of transport proteins operating from *Escherichia coli* to human: Traffic ATPases (75) 429
Anemüller, S., see Schäfer, G. (75) 335
Antranikian, G.
Physiology and enzymology of thermophilic anaerobic bacteria degrading starch (75) 201

Bakker, E.P.
The role of alkali-cation transport in energy coupling of neutrophilic and acidophilic bacteria: an assessment of methods and concepts (75) 319
Baquero, F., see Martínez, J.L. (75) 45
Bateson, M.M., see Ward, D.M. (75) 105
Booth, I.R. and Higgins, C.F.
Enteric bacteria and osmotic stress: intracellular potassium glutamate as a secondary signal of osmotic stress? (75) 239
Bos, P., see Pronk, J.T. (75) 293
Brierley, J.A.
Acidophilic thermophilic archaebacteria: potential application for metals recovery (75) 287

Daniels, L., see Le Faou, A. (75) 351
Delgado-Iribarren, A., see Martínez, J.L. (75) 45
De Vries, G.E., Kües, U. and Stahl, U.
Physiology and genetics of methylotrophic bacteria (75) 57
De Vrij, W., Speelmans, G., Heyne, R.I.R. and Konings, W.N.
Energy transduction and amino acid transport in thermophilic aerobic and fermentative bacteria (75) 183
De Vrij, W., see Prins, R.A. (75) 103

Egli, T., see Wanner, U. (75) 19

Fauque, G., see Le Faou, A. (75) 351
Fiala, G., see Stetter, K.O. (75) 117
Fukunaga, N., see Russell, N.J. (75) 171

Galinski, E.A., see Trüper, H.G. (75) 247
Gottschal, J.C., see Prins, R.A. (75) 103
Grant, W.D., Mwatha, W.E. and Jones, B.E.
Alkaliphiles: ecology, diversity and applications (75) 255
Guest, J.R., see Spiro, S. (75) 399
Guffanti, A.A., see Krulwich, T.A. (75) 271

Hansen, T.A., see Prins, R.A. (75) 103
Hazeu, W., see Pronk, J.T. (75) 293
Heyne, R.I.R., see De Vrij, W. (75) 183
Higgins, C.F., see Booth, I.R. (75) 239
Horikoshi, K.
Genetic applications of alkaliphilic microorganisms (75) 279
Huber, G., see Stetter, K.O. (75) 117
Huber, R., see Stetter, K.O. (75) 117

Jones, B.E., see Grant, W.D. (75) 255

Knappe, J. and Sawers, G.
A radical-chemical route to acetyl-CoA: the anaerobically induced pyruvate formate-lyase system of *Escherichia coli* (75) 383
Konings, W.N., see De Vrij, W. (75) 183
Krulwich, T.A., Guffanti, A.A. and Seto-Young, D.
pH homeostasis and bioenergetic work in alkalophiles (75) 271
Kuenen, J.G., see Pronk, J.T. (75) 293
Kües, U., see De Vries, G.E. (75) 57

Le Faou, A., Rajagopal, B.S., Daniels, L. and Fauque, G.
Thiosulfate, polythionates and elemental sulfur assimilation and reduction in the bacterial world (75) 351
Linton, J.D.
The relationship between metabolite production and the growth efficiency of the producing organism (75) 1
Lübben, M., see Schäfer, G. (75) 335

Martínez, J.L., Delgado-Iribarren, A. and Baquero, F.
Mechanisms of iron acquisition and bacterial virulence (75) 45
Matin, A.
Keeping a neutral cytoplasm; the bioenergetics of obligate acidophiles (75) 307
Meulenberg, R., see Pronk, J.T. (75) 293
Meyer, W., see Schäfer, G. (75) 335
Mimura, C.S., see Ames, G.F.-L. (75) 429
Moll, R., see Schäfer, G. (75) 335
Mwatha, W.E., see Grant, W.D. (75) 255

Prins, R.A., De Vrij, W., Gottschal, J.C. and Hansen, T.A.
Adaptation of microorganisms to extreme environments (75) 103
Pronk, J.T., Meulenberg, R., Hazeu, W., Bos, P. and Kuenen, J.G.
Oxidation of reduced inorganic sulphur compounds by acidophilic thiobacilli (75) 293

Rajagopal, B.S., see Le Faou, A. (75) 351
Russell, N.J. and Fukunaga, N.
A comparison of thermal adaptation of membrane lipids in psychrophilic and thermophilic bacteria (75) 171

Sawers, G., see Knappe, J. (75) 383
Schäfer, G., Anemüller, S., Moll, R., Meyer, W. and Lübben, M.
Electron transport and energy conservation in the archaebacterium *Sulfolobus acidocaldarius* (75) 335
Segerer, A., see Stetter, K.O. (75) 117
Seto-Young, D., see Krulwich, T.A. (75) 271
Shyamala, V., see Ames, G.F.-L. (75) 429
Speelmans, G., see De Vrij, W. (75) 183
Spiro, S. and Guest, J.R.
FNR and its role in oxygen-regulated gene expression in *Escherichia coli* (75) 399
Stahl, U., see De Vries, G.E. (75) 57
Stetter, K.O., Fiala, G., Huber, G., Huber, R. and Segerer, A.
Hyperthermophilic microorganisms (75) 117

Trüper, H.G. and Galinski, E.A.
Biosynthesis and fate of compatible solutes in extremely halophilic phototrophic eubacteria (75) 247

Wanner, U. and Egli, T.
Dynamics of microbial growth and cell composition in batch culture (75) 19
Ward, D.M., Weller, R. and Bateson, M.M.
16S rRNA Sequences reveal uncultured inhabitants of a well-studied thermal community (75) 105
Weller, R., see Ward, D.M. (75) 105
Wiegel, J.
Temperature spans for growth: hypothesis and discussion (75) 155
Winter, J. and Zellner, G.
Thermophilic anaerobic degradation of carbohydrates – metabolic properties of microorganisms from the different phases (75) 139

Zellner, G., see Winter, J. (75) 139
Zinder, S.H.
Conversion of acetic acid to methane by thermophiles (75) 125

FEMS Microbiology Reviews 75 (1990) 449–454
Published by Elsevier

FEMS Microbiology Reviews

SUBJECT INDEX VOL. 75

Acetate
Methanogenesis; Thermophiles; Interspecies hydrogen transfer (Zinder, S.H. (75) 125)

Acetogens
Thermophily; Carbohydrate; Metabolism; Syntrophy; Fermentative bacteria; Methanogens (Winter, J. (75) 139)

Acidophiles
Sulphur metabolism; *Thiobacillus*; Leaching (Pronk, J.T. (75) 293)

Acidophilic bacteria
ΔpH; Donnan potential; Proton diffusion potential; Chloride transport (Matin, A. (75) 307)

Neutrophilic bacteria; *Bacillus acidocaldarius*; Proton-motive force; Reversed membrane potential (internally positive); K^+-transport systems; TPP^+-distribution method; Centrifugation–filtration method (Bakker, E.P. (75) 319)

Acidophilic thermophiles
Metals recovery (Brierley, J.A. (75) 287)

Aerobic-anaerobic switch
FNR; CRP; Transcriptional regulation; DNA-binding proteins; *Escherichia coli* (Spiro, S. (75) 399)

Alkaliphilic bacteria
Ecology; Enzyme application (Grant, W.D. (75) 255)

Amylase
Starch degradation; Pullulanase; Thermophiles (Antranikian, G. (75) 201)

Anaerobic cryptic thermophiles
Thermophiles; Psychrophiles; Anaerobic extreme thermophiles; Temperature tolerance; Temperature span (Wiegel, J. (75) 155)

Anaerobic extreme thermophiles
Thermophiles; Psychrophiles; Anaerobic cryptic thermophiles; Temperature tolerance; Temperature span (Wiegel, J. (75) 155)

Anaerobic gene regulation
Protein radical; Enzyme interconversion (Knappe, J. (75) 383)

Archaebacteria
Eubacteria; Fatty acid biosynthesis; Homeoviscous adaptation; Psychrotrophic bacteria (Russell, N.J. (75) 171)

Hydrogenase; *Pyrococcus furiosus*; Metalloenzymes (Adams, M.W.W. (75) 219)

Electrontransport; Cytochromes; ATP-synthase; Chemiosmosis; Thermoacidophiles (Schäfer, G. (75) 335)

Thiosulfate reductase; Polythionate reductase; Thiosulfate sulfur transferase; Sulfur compounds assimilation; Eubacteria (Le Faou, A. (75) 351)

ATP binding proteins
Periplasmic permeases; Traffic ATPases; Energy coupling; Conserved amino acid homology; Multidrug resistance (Ames, G.F.-L. (75) 429)

ATP-synthase
Archaebacteria; Electrontransport; Cytochromes; Chemiosmosis; Thermoacidophiles (Schäfer, G. (75) 335)

Bacillus
Na^+/H^+ antiporter; Proteoliposomes (Krulwich, T.A. (75) 271)

Bacillus acidocaldarius
Acidophilic bacteria; Neutrophilic bacteria; Proton-motive force; Reversed membrane potential (internally positive); K^+-transport systems; TPP^+-distribution method; Centrifugation–filtration method (Bakker, E.P. (75) 319)

Batch culture
Growth; Nutrient limitations; Cell composition; Carbon; Nitrogen; Phosphorus; Sulphur; Potassium; Dynamics; Exponential phase; Stationary phase (Wanner, U. (75) 19)

Betaine
Compatible solutes; Potassium; Glutamate; Gene expression; Transport; Osmoregulation; DNA supercoiling (Booth, I.R. (75) 239)

Carbohydrate
Thermophily; Metabolism; Syntrophy; Fermentative bacteria; Acetogens; Methanogens (Winter, J. (75) 139)

Carbon
Growth; Nutrient limitations; Batch culture; Cell composition; Nitrogen; Phosphorus; Sulphur; Potassium; Dynamics; Exponential phase; Stationary phase (Wanner, U. (75) 19)

0168-6445/90/$03.50 © 1990 Federation of European Microbiological Societies

Cell composition
Growth; Nutrient limitations; Batch culture; Carbon; Nitrogen; Phosphorus; Sulphur; Potassium; Dynamics; Exponential phase; Stationary phase (Wanner, U. (75) 19)

Centrifugation–filtration method
Acidophilic bacteria; Neutrophilic bacteria; *Bacillus acidocaldarius*; Proton-motive force; Reversed membrane potential (internally positive); K^+-transport systems; TPP^+-distribution method (Bakker, E.P. (75) 319)

Chemiosmosis
Archaebacteria; Electrontransport; Cytochromes; ATP-synthase; Thermoacidophiles (Schäfer, G. (75) 335)

Chloride transport
ΔpH; Acidophilic bacteria; Donnan potential; Proton diffusion potential (Matin, A. (75) 307)

Chromosomal mapping
Methylotrophy; Electron transport; Gene characterization; Extrachromosomal genetics (De Vries, G.E. (75) 57)

Community composition
Hot spring; 16S rcDNA; Cyanobacterial mat (Octopus Spring); Molecular biology (Ward, D.M. (75) 105)

Compatible solutes
Betaine; Potassium; Glutamate; Gene expression; Transport; Osmoregulation; DNA supercoiling (Booth, I.R. (75) 239)

Conserved amino acid homology
Periplasmic permeases; Traffic ATPases; ATP binding proteins; Energy coupling; Multidrug resistance (Ames, G.F.-L. (75) 429)

CRP
FNR; Transcriptional regulation; DNA-binding proteins; Aerobic-anaerobic switch; *Escherichia coli* (Spiro, S. (75) 399)

Cyanobacterial mat (Octopus Spring)
Hot spring; 16S rcDNA; Molecular biology; Community composition (Ward, D.M. (75) 105)

Cytochromes
Archaebacteria; Electrontransport; ATP-synthase; Chemiosmosis; Thermoacidophiles (Schäfer, G. (75) 335)

Dilution stress
Ectothiorhodospira; Glycinebetaine synthesis; Trehalose metabolism; Ectoine synthesis; Salt stress (Trüper, H.G. (75) 247)

16S rcDNA
Hot spring; Cyanobacterial mat (Octopus Spring); Molecular biology; Community composition (Ward, D.M. (75) 105)

DNA-binding proteins
FNR; CRP; Transcriptional regulation; Aerobic-anaerobic switch; *Escherichia coli* (Spiro, S. (75) 399)

DNA supercoiling
Compatible solutes; Betaine; Potassium; Glutamate; Gene expression; Transport; Osmoregulation (Booth, I.R. (75) 239)

Donnan potential
ΔpH; Acidophilic bacteria; Proton diffusion potential; Chloride transport (Matin, A. (75) 307)

Dynamics
Growth; Nutrient limitations; Batch culture; Cell composition; Carbon; Nitrogen; Phosphorus; Sulphur; Potassium; Exponential phase; Stationary phase (Wanner, U. (75) 19)

Ecology
Alkaliphilic bacteria; Enzyme application (Grant, W.D. (75) 255)

Ectoine synthesis
Ectothiorhodospira; Glycinebetaine synthesis; Trehalose metabolism; Dilution stress; Salt stress (Trüper, H.G. (75) 247)

Ectothiorhodospira
Glycinebetaine synthesis; Trehalose metabolism; Ectoine synthesis; Dilution stress; Salt stress (Trüper, H.G. (75) 247)

Electron transport
Methylotrophy; Chromosomal mapping; Gene characterization; Extrachromosomal genetics (De Vries, G.E. (75) 57)

Electrontransport
Archaebacteria; Cytochromes; ATP-synthase; Chemiosmosis; Thermoacidophiles (Schäfer, G. (75) 335)

Energy coupling
Periplasmic permeases; Traffic ATPases; ATP binding proteins; Conserved amino acid homology; Multidrug resistance (Ames, G.F.-L. (75) 429)

Energy transduction
Thermophilic bacteria; Solute transport; Membrane fusion (De Vrij, W. (75) 183)

Enzyme application
Alkaliphilic bacteria; Ecology (Grant, W.D. (75) 255)

Enzyme interconversion
Protein radical; Anaerobic gene regulation (Knappe, J. (75) 383)

Escherichia coli
Extracellular proteins; *kil*-gene; Secretion (Horikoshi, K. (75) 279)

FNR; CRP; Transcriptional regulation; DNA-binding proteins; Aerobic-anaerobic switch (Spiro, S. (75) 399)

Eubacteria
Archaebacteria; Fatty acid biosynthesis; Homeoviscous adaptation; Psychrotrophic bacteria (Russell, N.J. (75) 171)

Thiosulfate reductase; Polythionate reductase; Thiosulfate sulfur transferase; Sulfur compounds assimilation; Archaebacteria (Le Faou, A. (75) 351)

Exopolysaccharide
Growth yields; Product formation; Potential improvements (Linton, J.D. (75) 1)

Exponential phase
Growth; Nutrient limitations; Batch culture; Cell composition; Carbon; Nitrogen; Phosphorus; Sulphur; Potassium; Dynamics; Stationary phase (Wanner, U. (75) 19)

Extracellular proteins
Escherichia coli; *kil*-gene; Secretion (Horikoshi, K. (75) 279)

Extrachromosomal genetics
Methylotrophy; Electron transport; Chromosomal mapping; Gene characterization (De Vries, G.E. (75) 57)

Fatty acid biosynthesis
Eubacteria; Archaebacteria; Homeoviscous adaptation; Psychrotrophic bacteria (Russell, N.J. (75) 171)

Fermentative bacteria
Thermophily; Carbohydrate; Metabolism; Syntrophy; Acetogens; Methanogens (Winter, J. (75) 139)

FNR
CRP; Transcriptional regulation; DNA-binding proteins; Aerobic-anaerobic switch; *Escherichia coli* (Spiro, S. (75) 399)

Gene characterization
Methylotrophy; Electron transport; Chromosomal mapping; Extrachromosomal genetics (De Vries, G.E. (75) 57)

Gene expression
Compatible solutes; Betaine; Potassium; Glutamate; Transport; Osmoregulation; DNA supercoiling (Booth, I.R. (75) 239)

Glutamate
Compatible solutes; Betaine; Potassium; Gene expression; Transport; Osmoregulation; DNA supercoiling (Booth, I.R. (75) 239)

Glycinebetaine synthesis
Ectothiorhodospira; Trehalose metabolism; Ectoine synthesis; Dilution stress; Salt stress (Trüper, H.G. (75) 247)

Growth
Nutrient limitations; Batch culture; Cell composition; Carbon; Nitrogen; Phosphorus; Sulphur; Potassium; Dynamics; Exponential phase; Stationary phase (Wanner, U. (75) 19)

Growth yields
Product formation; Potential improvements; Exopolysaccharide (Linton, J.D. (75) 1)

Haemolysin
Siderophore; Iron-binding protein; Pathogenic bacteria (Martínez, J.L. (75) 45)

Homeoviscous adaptation
Eubacteria; Archaebacteria; Fatty acid biosynthesis; Psychrotrophic bacteria (Russell, N.J. (75) 171)

Hot spring
16S rcDNA; Cyanobacterial mat (Octopus Spring); Molecular biology; Community composition (Ward, D.M. (75) 105)

Hydrogenase
Archaebacteria; *Pyrococcus furiosus*; Metalloenzymes (Adams, M.W.W. (75) 219)

Hyperthermophiles
Taxonomy (Stetter, K.O. (75) 117)

Interspecies hydrogen transfer
Methanogenesis; Acetate; Thermophiles (Zinder, S.H. (75) 125)

Iron-binding protein
Siderophore; Haemolysin; Pathogenic bacteria (Martínez, J.L. (75) 45)

***kil*-gene**
Extracellular proteins; *Escherichia coli*; Secretion (Horikoshi, K. (75) 279)

K^+-transport systems
Acidophilic bacteria; Neutrophilic bacteria; *Bacillus acidocaldarius*; Proton-motive force; Reversed membrane potential (internally positive); TPP^+-distribution method; Centrifugation–filtration method (Bakker, E.P. (75) 319)

Leaching
Sulphur metabolism; *Thiobacillus*; Acidophiles (Pronk, J.T. (75) 293)

Membrane fusion
Thermophilic bacteria; Solute transport; Energy transduction (De Vrij, W. (75) 183)

Metabolism
Thermophily; Carbohydrate; Syntrophy; Fermentative bacteria; Acetogens; Methanogens (Winter, J. (75) 139)

Metalloenzymes
Archaebacteria; Hydrogenase; *Pyrococcus furiosus* (Adams, M.W.W. (75) 219)

Metals recovery
Acidophilic thermophiles (Brierley, J.A. (75) 287)

Methanogenesis
Acetate; Thermophiles; Interspecies hydrogen transfer (Zinder, S.H. (75) 125)

Methanogens
Thermophily; Carbohydrate; Metabolism; Syntrophy; Fermentative bacteria; Acetogens (Winter, J. (75) 139)

Methylotrophy
Electron transport; Chromosomal mapping; Gene characterization; Extrachromosomal genetics (De Vries, G.E. (75) 57)

Molecular biology
Hot spring; 16S rcDNA; Cyanobacterial mat (Octopus Spring); Community composition (Ward, D.M. (75) 105)

Multidrug resistance
Periplasmic permeases; Traffic ATPases; ATP binding proteins; Energy coupling; Conserved amino acid homology (Ames, G.F.-L. (75) 429)

Na^+/H^+ antiporter
Proteoliposomes; *Bacillus* (Krulwich, T.A. (75) 271)

Neutrophilic bacteria
Acidophilic bacteria; *Bacillus acidocaldarius*; Proton-motive force; Reversed membrane potential (internally positive); K^+-transport systems; TPP^+-distribution method; Centrifugation–filtration method (Bakker, E.P. (75) 319)

Nitrogen
Growth; Nutrient limitations; Batch culture; Cell composition; Carbon; Phosphorus; Sulphur; Potassium; Dynamics; Exponential phase; Stationary phase (Wanner, U. (75) 19)

Nutrient limitations
Growth; Batch culture; Cell composition; Carbon; Nitrogen; Phosphorus; Sulphur; Potassium; Dynamics; Exponential phase; Stationary phase (Wanner, U. (75) 19)

Osmoregulation
Compatible solutes; Betaine; Potassium; Glutamate; Gene expression; Transport; DNA supercoiling (Booth, I.R. (75) 239)

Pathogenic bacteria
Siderophore; Haemolysin; Iron-binding protein (Martinez, J.L. (75) 45)

Periplasmic permeases
Traffic ATPases; ATP binding proteins; Energy coupling; Conserved amino acid homology; Multidrug resistance (Ames, G.F.-L. (75) 429)

ΔpH
Acidophilic bacteria; Donnan potential; Proton diffusion potential; Chloride transport (Matin, A. (75) 307)

Phosphorus
Growth; Nutrient limitations; Batch culture; Cell composition; Carbon; Nitrogen; Sulphur; Potassium; Dynamics; Exponential phase; Stationary phase (Wanner, U. (75) 19)

Polythionate reductase
Thiosulfate reductase; Thiosulfate sulfur transferase; Sulfur compounds assimilation; Eubacteria; Archaebacteria (Le Faou, A. (75) 351)

Potassium
Growth; Nutrient limitations; Batch culture; Cell composition; Carbon; Nitrogen; Phosphorus; Sulphur; Dynamics; Exponential phase; Stationary phase (Wanner, U. (75) 19)

Compatible solutes; Betaine; Glutamate; Gene expression; Transport; Osmoregulation; DNA supercoiling (Booth, I.R. (75) 239)

Potential improvements
Growth yields; Product formation; Exopolysaccharide (Linton, J.D. (75) 1)

Product formation
Growth yields; Potential improvements; Exopolysaccharide (Linton, J.D. (75) 1)

Protein radical
Enzyme interconversion; Anaerobic gene regulation (Knappe, J. (75) 383)

Proteoliposomes
Na^+/H^+ antiporter; *Bacillus* (Krulwich, T.A. (75) 271)

Proton diffusion potential
ΔpH; Acidophilic bacteria; Donnan potential; Chloride transport (Matin, A. (75) 307)

Proton-motive force
Acidophilic bacteria; Neutrophilic bacteria; *Bacillus acidocaldarius*; Reversed membrane potential (internally positive); K^+-transport systems; TPP^+-distribution method; Centrifugation–filtration method (Bakker, E.P. (75) 319)

Psychrophiles
Thermophiles; Anaerobic cryptic thermophiles; Anaerobic extreme thermophiles; Temperature tolerance; Temperature span (Wiegel, J. (75) 155)

Psychrotrophic bacteria
Eubacteria; Archaebacteria; Fatty acid biosynthesis; Homeoviscous adaptation (Russell, N.J. (75) 171)

Pullulanase
Starch degradation; Amylase; Thermophiles (Antranikian, G. (75) 201)

Pyrococcus furiosus
Archaebacteria; Hydrogenase; Metalloenzymes (Adams, M.W.W. (75) 219)

Reversed membrane potential (internally positive)
Acidophilic bacteria; Neutrophilic bacteria; *Bacillus acidocaldarius*; Proton-motive force; K^+-transport systems; TPP^+-distribution method; Centrifugation–filtration method (Bakker, E.P. (75) 319)

Salt stress
Ectothiorhodospira; Glycinebetaine synthesis; Trehalose metabolism; Ectoine synthesis; Dilution stress (Trüper, H.G. (75) 247)

Secretion
Extracellular proteins; *Escherichia coli*; *kil*-gene (Horikoshi, K. (75) 279)

Siderophore
Haemolysin; Iron-binding protein; Pathogenic bacteria (Martínez, J.L. (75) 45)

Solute transport
Thermophilic bacteria; Energy transduction; Membrane fusion (De Vrij, W. (75) 183)

Starch degradation
Amylase; Pullulanase; Thermophiles (Antranikian, G. (75) 201)

Stationary phase
Growth; Nutrient limitations; Batch culture; Cell composition; Carbon; Nitrogen; Phosphorus; Sulphur; Potassium; Dynamics; Exponential phase (Wanner, U. (75) 19)

Sulfur compounds assimilation
Thiosulfate reductase; Polythionate reductase; Thiosulfate sulfur transferase; Eubacteria; Archaebacteria (Le Faou, A. (75) 351)

Sulphur
Growth; Nutrient limitations; Batch culture; Cell composition; Carbon; Nitrogen; Phosphorus; Potassium; Dynamics; Exponential phase; Stationary phase (Wanner, U. (75) 19)

Sulphur metabolism
Thiobacillus; Acidophiles; Leaching (Pronk, J.T. (75) 293)

Syntrophy
Thermophily; Carbohydrate; Metabolism; Fermentative bacteria; Acetogens; Methanogens (Winter, J. (75) 139)

Taxonomy
Hyperthermophiles (Stetter, K.O. (75) 117)

Temperature span
Thermophiles; Psychrophiles; Anaerobic cryptic thermophiles; Anaerobic extreme thermophiles; Temperature tolerance (Wiegel, J. (75) 155)

Temperature tolerance
Thermophiles; Psychrophiles; Anaerobic cryptic thermophiles; Anaerobic extreme thermophiles; Temperature span (Wiegel, J. (75) 155)

Thermoacidophiles
Archaebacteria; Electrontransport; Cytochromes; ATP-synthase; Chemiosmosis (Schäfer, G. (75) 335)

Thermophiles
Methanogenesis; Acetate; Interspecies hydrogen transfer (Zinder, S.H. (75) 125)

Psychrophiles; Anaerobic cryptic thermophiles; Anaerobic extreme thermophiles; Temperature tolerance; Temperature span (Wiegel, J. (75) 155)

Starch degradation; Amylase; Pullulanase (Antranikian, G. (75) 201)

Thermophilic bacteria
Solute transport; Energy transduction; Membrane fusion (De Vrij, W. (75) 183)

Thermophily
Carbohydrate; Metabolism; Syntrophy; Fermentative bacteria; Acetogens; Methanogens (Winter, J. (75) 139)

Thiobacillus
Sulphur metabolism; Acidophiles; Leaching (Pronk, J.T. (75) 293)

Thiosulfate reductase
Polythionate reductase; Thiosulfate sulfur transferase; Sulfur compounds assimilation; Eubacteria; Archaebacteria (Le Faou, A. (75) 351)

Thiosulfate sulfur transferase
Thiosulfate reductase; Polythionate reductase; Sulfur compounds assimilation; Eubacteria; Archaebacteria (Le Faou, A. (75) 351)

TPP^+-distribution method
Acidophilic bacteria; Neutrophilic bacteria; *Bacillus acidocaldarius*; Proton-motive force; Reversed membrane potential (internally positive); K^+-transport systems; Centrifugation–filtration method (Bakker, E.P. (75) 319)

Traffic ATPases
Periplasmic permeases; ATP binding proteins; Energy coupling; Conserved amino acid homology; Multidrug resistance (Ames, G.F.-L. (75) 429)

Transcriptional regulation
FNR; CRP; DNA-binding proteins; Aerobic-anaerobic switch; *Escherichia coli* (Spiro, S. (75) 399)

Transport
Compatible solutes; Betaine; Potassium; Glutamate; Gene expression; Osmoregulation; DNA supercoiling (Booth, I.R. (75) 239)

Trehalose metabolism
Ectothiorhodospira; Glycinebetaine synthesis; Ectoine synthesis; Dilution stress; Salt stress (Trüper, H.G. (75) 247)
